

Plastic Water Heater Pans

The Eastman Plastic Water Heater Drain Pan is a durable solution for preventing water damage from leaks or runoff. Made from high-impact plastic, this pan resists rust, corrosion, and cracking, ensuring long-lasting performance.

Each pan includes a 1-inch CPVC or PVC drain fitting for secure connection to a drain pipe through a pre-cut side opening. Its lightweight yet sturdy construction makes installation easy while offering reliable protection.

Applications

Designed for electric water heaters in compliance with local plumbing codes. Helps contain water leaks, reducing the risk of floor and fixture damage. Suitable for residential and commercial installations where a lightweight yet durable solution is needed.

Water Heater Drain Fittings

Each Eastman Water Heater Drain Pan includes a high-quality drain fitting, designed for secure and efficient water drainage. The fitting allows for a simple connection to a drain pipe, helping to redirect leaks or excess water safely away from the installation site.

Applications

Compatible with both aluminum and plastic water heater pans, depending on the selected model.
